**Complete guide for RVPO
(temporary residence permit for education purposes)**

General information

In accordance with Item 10 of Article 6.2 of the Federal Law of July, 25, 2022 № 115-FZ «Concerning the Legal Status of Foreign Citizens in the Russian Federation», since January, 1, 2023, in Russia there is a new type of document available for international students – a temporary residence permit for education purposes (abbreviated as RVPO).

RVPO will give an opportunity to foreign citizens, studying in Russia by state-accredited bachelor's, specialist's or master's educational programs, medical residency and probation assistantship programs, or by postgraduate programs of academic and teaching staff training, to obtain a status of temporary resident in the Russian Federation for the period of education.

Temporary residence permit for education purposes will be granted only for students of intramural form of study. If the form of study is changed, the RVPO will be cancelled.

The international students of extramural and mixed intra-extramural forms of study stay on the territory of Russia under the same conditions, as foreign citizens, temporarily staying in the Russian Federation:

- international students from visa-free travel countries – on the basis of a migration card, in which study is stated as purpose of travel;
- international students from visa-requiring countries – on the basis of an educational visa.

The students of extramural and mixed intra-extramural forms of study can still submit documents for quota. Education in the Russian Federation is one of the criteria for providing quota for temporary residence permit (RVP).

Unlike foreign citizens with a usual temporary residence permit (RVP), international students with a RVPO will not have to prolong and confirm it.

The validity period of RVPO

After making a RVPO international students will be able to stay in Russia during the whole period of study.

If they transfer to another higher educational institution or to another educational program, the RVPO remains valid, - if the form of education remains intramural, and the new educational program is also state-accredited.

In case of transfer, a student is obliged to send a set of transfer documents to the MIA (Ministry of Internal Affairs) within 30 calendar days; otherwise the RVPO may be cancelled.

After graduating from a higher educational institution, the RVPO remains valid for half a year more – for 180 days, during which a student may, without leaving Russia, submit documents for getting a permanent residence permit (VNZH).

The same possibility will remain for 3 years for graduates of intramural form of study, who earlier had a RVPO.

Can RVPO be cancelled?

RVPO can be cancelled in case of expulsion of a student. In this case a foreign citizen will be obliged to leave the territory of Russia.

RVPO can be also cancelled for common reasons: for example, in case of immigration violations, administrative fines, criminal convictions, detection of dangerous infectious diseases.
